

Software Developer Needed

Attention CAA Members and Industry Partners:

Due to the overwhelming success of the CAA's new software development initiative SnoInfoPLUS, strong and sustained growth in the CAA's InfoEx program and growing demands for our web-based services we are in need of an additional software developer to help support and grow our programs further. This is notification that the CAA has a job opportunity open at this time and we are actively looking for a new staff member.

This job posting will remain open until filled. Interested applicants are asked to contact the CAA immediately with cover letter, resume and at least three professional references. This is a term position until May 2008, at which time it will be reviewed and may become a permanent position. Wages will be commensurate with industry experience and training.

The ideal candidate will possess the following skills and training:

- Microsoft .NET Development experience including:
 - C# language
 - Web services
 - Win Forms
 - Knowledge of VB.NET language
- SQL 2000 administration and development experience (SQL 2005 an asset)
 - TSQL
 - SQL Server Reporting Services
- Experience with the use of XML technologies, including:
 - XSLT transforms
 - XSD schemas
- HTML programming knowledge
 - Web design experience preferred but not essential
- Object oriented programming and design experience
- Knowledge of the avalanche community and industry an asset
- User technical support
- Capacity to work in a dynamic team environment
- Strong communication and interpersonal skills
- Demonstrated commitment to service quality

Residency in Revelstoke is preferred but not required. Interested applicants are requested to contact CAA Operations Manager Ian Tomm immediately.
